Power of Three: Deploying the Most Impactful Azure Capabilities

Azure Active Directory Premium (AADP) is a foundational building block of the Microsoft hybrid identity, enterprise mobility, and cloud security vision. It helps organizations take their identity and access management (IAM) into the cloud with a comprehensive list of features and powerful self-service capabilities.

Avaleris has developed this service offering to accelerate our clients' leap to the cloud by addressing the three most impactful user experience features:

- single sign-on (SSO) to cloud apps,

- self-service password reset (SSPR), and

- multi-factor authentication (MFA).

With this "quick wins" deployment, client organizations can empower users, add security, and decrease helpdesk calls all at once.

This deployment is delivered by a senior consultant with a deep knowledge of identity and access management, enterprise mobility, and the newest Microsoft products.

It includes:

- Strategic planning session around business objectives and your organization's identity and access management needs;

- Design of the AADP deployment focusing on SSO, SSPR, and cloud MFA;

- Enablement and configuration of applicable policies and integration with existing systems;

- Configuration of three apps and deployment of AADP into your production environment; and

- Monitoring post-launch performance, administrator and end-user training, launch support and adoption optimization.

AVALERIS SERVICES APPROACH

We believe that an in-depth understanding of business objectives and continuous optimization is the key to client success. We do not only deploy software, we seek to understand where your organization is headed and what success means to you. Then, we make sure you achieve this with technology adoption support and continued check-ins to ensure that you are meeting all goals and gaining the most value out of the technology investment.

This packaged service offering covers the PLAN, DEPLOY, ADOPT, and OPTIMIZE stages of our client engagement process.

PLAN	DEPLOY	ADOPT	OPTIMIZE
Identity & access management is a complex mission-critical business imperative. Leveraging deep industry knowledge, our thought leaders work strategically with your team to build your IAM blueprint.	Our specialized consultants work hand in hand with your team to define, design, develop, test, and deploy your tailored solution. We ensure we are aligned with your team's schedule and objectives.	Our team helps you start off on the right foot by providing the training, tools, support, and expertise that you needs to ensure successful adoption in the organization. We help your team see business value sooner.	Our expert coaches implement a structured, ongoing evaluation and optimization process to ensure continued success of the solution and to help you meet evolving business needs.

ESTIMATED EFFORT

15-30 days, depending on the apps selected by the client + ongoing OPTIMIZE package subject to client requirements. Final Statement of Work details will be mutually agreed upon by the Client and Avaleris.

AVALERIS VALUE PROPOSITION

As a niche professional services firm focused exclusively on hybrid identity, enterprise mobility, and cloud security, we are the trusted advisor to hundreds of Microsoft's largest private and public sector clients. Avaleris helps improve business agility and security in the way these organizations manage identities, devices, and cloud applications.

Avaleris clients benefit from our consultants' extensive deployment experience, deep technical knowledge of Microsoft products, as well as their unrelenting focus on client success.
