

# Cloud Security Assessment

## COMBAT THREATS WHILE EMPOWERING YOUR USERS

Shadow IT and mobility has changed the way we conduct business by empowering users and improving efficiencies. However, with the ever growing number of user-adopted cloud apps, the traditional security perimeter of an organization is a thing of the past.

### ABOUT ADVANCED THREAT ANALYTICS

Microsoft Advanced Threat Analytics is an advanced threat monitoring solution for enterprise AD deployments. It identifies breaches and threats using behavioral analytics and presents suspicious activities in a clear actionable interface. This on-premises software now comes included in Enterprise Mobility + Security (EMS) and most Microsoft Enterprise Client Access Licensing (ECAL) agreements.

Organizations' security concerns are further exasperated by high-profile data breaches of their peers, making identity-driven security a top-of-mind issue at the C-level. To help organizations address these concerns, Avaleris offers a CISO-ready identity-driven security assessment and recommendation report. This security assessment addresses threats such as:

- Compromised cloud resources;
- Stolen credentials;
- Anomalous behaviour;
- Data leakage;
- Intruder posing as an internal user; and
- Phishing attacks and email viruses.

The cloud security assessment from Avaleris is prepared by a CISSP-certified senior consultant with a deep understanding of cloud and on-premises security technologies and the newest Microsoft

It includes:

- Strategic planning session around business objectives and your organization's unique security circumstances;
- Full evaluation of current cloud security tools and identification of threats, outdated practices and security gaps;
- Recommendation of a cloud security architecture using the most up-to-date Microsoft security tools; and
- A CISO-ready recommendations report detailing threats, exposure, and recommended architecture.

## AVALERIS SERVICES APPROACH

We believe that an in-depth understanding of business objectives and continuous optimization is the key to client success. We do not only deploy software, we seek to understand where your organization is headed and what success means to you. Then, we make sure you achieve this with technology adoption support and continued check-ins to ensure that you are meeting all goals and gaining the most value out of the technology investment.

This packaged service offering covers the **PLAN** stage of our client engagement process. You can further count on us to support you through the deployment of your identity-driven security architecture, project launch, and beyond as we work with you to deploy your security implementation.

### PLAN

Identity & access management is a complex mission-critical business imperative. Leveraging deep industry knowledge, our thought leaders work strategically with your team to build your IAM blueprint.

### DEPLOY

Our specialized consultants work hand in hand with your team to define, design, develop, test, and deploy your tailored solution. We ensure we are aligned with your team's schedule and objectives.

### ADOPT

Our team helps you start off on the right foot by providing the training, tools, support, and expertise that you need to ensure successful adoption in the organization. We help your team see business value sooner.

### OPTIMIZE

Our expert coaches implement a structured, ongoing evaluation and optimization process to ensure continued success of the solution and to help you meet evolving business needs.

## ESTIMATED EFFORT

7-15 days. Final Statement of Work details will be mutually agreed upon by the Client and Avaleris.

## AVALERIS VALUE PROPOSITION

As a niche professional services firm focused exclusively on hybrid identity, enterprise mobility, and cloud security, we are the trusted advisor to hundreds of Microsoft's largest private and public sector clients. Avaleris helps improve business agility and security in the way these organizations manage identities, devices, and cloud applications.

Avaleris clients benefit from our consultants' extensive deployment experience, deep technical knowledge of Microsoft products, as well as their unrelenting focus on client success.
