

Active Directory Optimization

ENSURE A SOLID FOUNDATION FOR IDENTITY MANAGEMENT

With identity management growing in importance, both to business transformation and cybersecurity, many organizations are embarking on major changes: moving to the cloud, embracing mobility, and integrating new hybrid technologies.

As these projects come down the IT pipeline, this is the perfect time to assess the existing Active Directory and ensure that it still meets your business needs.

The Active Directory Optimization from Avaleris is prepared by an experienced consultant with a deep understanding of cloud and on-premises identity management technologies.

It consists of:

- A thorough review of business needs, procedures and practices and associated identity management strategy;
- A thorough review of existing infrastructure, processes, and interdependencies;
- An analysis of internal data from the Active Directory; and
- A detailed document of findings and recommendations.

This Optimization includes a detailed review of:

- Active Directory Forest and Domain Structure;
- Active Directory Site and Services topology;
- Account Management (Administrative Access, Group Management, Delegations etc.);
- Group policy objects;
- Current administrative and identity management processes;
- Active Directory Replication;
- Active Directory Domain Trusts;
- Operation Master and Global Catalog Server placement;
- Organizational Unit design;
- Domain Controller configuration (Hardware and Software);
- Domain Name System (DNS);
- Dynamic Host Configuration Protocol (DHCP);
- Windows Internet Name Service (WINS);
- Time service and Windows updates; and
- Backup/recovery and Anti-Virus.

AVALERIS SERVICES APPROACH

We believe that an in-depth understanding of business objectives and continuous optimization is the key to client success. We do not only deploy software, we seek to understand your organization's objectives and what success means to you. Then, we make sure you achieve this with technology adoption support and continued check-ins to ensure that you are meeting all goals and gaining the most value out of the technology investment.

This packaged service offering covers the PLAN stage of our client engagement process. You can further count on us to support you through the design, migration or remediation of your active directory infrastructure and beyond as we work with you to optimize your hybrid identity management.

PLAN

Identity & access management is a complex mission-critical business imperative. Leveraging deep industry knowledge, our thought leaders work strategically with your team to build your IAM blueprint.

DEPLOY

Our specialized consultants work hand in hand with your team to define, design, develop, test, and deploy your tailored solution. We ensure we are aligned with your team's schedule and objectives.

ADOPT

Our team helps you start off on the right foot by providing the training, tools, support, and expertise that you need to ensure successful adoption in the organization. We help your team see business value sooner.

OPTIMIZE

Our expert coaches implement a structured, ongoing evaluation and optimization process to ensure continued success of the solution and to help you meet evolving business needs.

ESTIMATED EFFORT

10-15 days for one AD forest. Final Statement of Work details will be mutually agreed upon by the Client and Avaleris.

AVALERIS VALUE PROPOSITION

As a niche professional services firm focused exclusively on hybrid identity, enterprise mobility, and cloud security, we are the trusted advisor to hundreds of Microsoft's largest private and public sector clients. Avaleris helps improve business agility and security in the way these organizations manage identities, devices, and cloud applications.

Avaleris clients benefit from our consultants' extensive deployment experience, deep technical knowledge of Microsoft products, as well as their unrelenting focus on client success.
