

Parents' Simple and Secure Access to School Apps with the Avaleris ParentHub

Transform the parent experience with a convenient and reliable Portal to access their children's information securely

Designed with simplicity and security in mind by THE trusted Microsoft identity experts. Ensure parents and guardians are who they say they are, while allowing them to manage their own identities and gain simple and secure access to their children's school apps.

The ParentHub allows school boards to offload the management of parent and guardian identities and cumbersome infrastructure. The solution enables secure access and communication & simplified collaboration through seamless integration with the most common tools used in schools today.

Gain peace of mind with a secure and reliable solution

54% of companies experience one or more successful attack that compromised data and/or IT infrastructure in 2018 (so far)

Problem

Increasingly, organizations are winding up in the news due to identities and sensitive personal data being leaked after a security breach. With the aggregation of all this information in one place, a security strategy is paramount.

Solution

The Avaleris ParentHub leans on the MOST secure cloud platform on the planet: Microsoft Azure. With secure Identity Assurance (student to guardian mapping) and the Azure (B2C) guardian identity repository, you can rely on the ParentHub!

Enhanced overall user satisfaction

Modern society is not afraid to adopt those new technologies that can quickly impact their lives for the better

Problem

Adversity to change is a known barrier to adoption with new technology. In a world of instant gratification, if a solution isn't easy, users will not accept it.

Solution

ParentHub offers a simple user journey for parents and guardians to gain access to the information and applications they need. Parents will no longer have to remember multiple credentials and go to various locations. ParentHub provides a one-stop shop and allows them to bring one identity.

Save time and money - don't try this at home!

Only 1/3 of organizations believe they have adequate resources to manage security effectively.

Problem

Too many resources are being used trying to stay on top of the different and ever-changing technologies and organizations are coming up short.

Solution

Leave it to the experts. Avaleris created ParentHub using our exclusive access to the Identity Experience Framework (IEF) – as one of Microsoft's most trusted identity and security partners in Education. Designed, implemented, managed and maintained by Avaleris – the ParentHub streamlines school administrator and guardian efforts, and frees up IT staff to do other tasks. By entrusting Avaleris to solve your parent access challenges, you will save time and money.

The Avaleris Success Guarantee

We do the thinking and put the right pieces in place for you.
