Working Better Together

Teamwork in the digital age means empowering your employees to create, connect and collaborate anywhere, on any device. A secure shared network is essential to increase productivity, safeguard your business and simplify your IT management.

Collaborate with the Cloud

Microsoft's Cloud technology robustly protects your company from external threats and leaks while facilitating collaboration. With Microsoft Office 365 (O365) and Azure Active Directory Premium (AADP), your team can stay connected and productive anywhere, anytime. Employees with a device and an Internet connection can quickly and easily access files and communicate and share with colleagues. Users, groups and devices are kept in-sync with Azure AD Connect, allowing for real-time collaboration and optimal productivity.

> Microsoft Office 365 and Azure Active Directory Premium combine the best tools and technology for today's working environment, helping to empower your team, simplify your workflow and protect your data.

I've Invested in Microsoft Azure – What Next?

Ensure that your deployment leverages the right security controls, meets Microsoft and industry best practices, and makes the most of your investment. Avaleris' expert consultants conduct a thorough assessment of your O365 and AADP environment to identify any security gaps. Next, we provide comprehensive recommendations to close those gaps, enhance security and deliver maximum ROI on your investment.

Phase I: Review & Assess

Avaleris reviews your current O365 environment and gathers the information needed to provide deployment and configuration recommendations during Phases II and III. We lead a thorough workshop with your IT representatives to understand your current O365 and Azure AD deployment, configuration and security controls, including any challenges or concerns. **The Phase I deliverable is a draft of the Environment Review and Current Challenges sections of the O365 and AD Assessment Report.**

Phase II: Analyze

Avaleris analyzes the information gathered in Phase I to conduct a security assessment and gap analysis. This enables us to determine how your deployment of O365 and associated technologies compares to Microsoft and industry best practices, and make any necessary deployment or configuration recommendations. **The Phase II deliverable is a draft of the Security Assessment and Recommendations sections of the M365 and AADP Assessment.**

Phase III: Recommend

We incorporate your feedback to provide two comprehensive deliverables:

1. A **finalized O365 and AADP Security Assessment** that includes customized recommendations to gain the most value from your Microsoft Assessment

2. A **PowerPoint presentation delivered to project stakeholders** that summarizes the report's findings and recommendations

Why Avaleris?

Avaleris is a trusted advisor to hundreds of Microsoft's largest private and public sectors. We go beyond solution deployments. Our team develops an in-depth understanding of your business objectives to ensure you reach your goals and gain the most value from your technology investments. Through strategic planning, well-executed deployments and a focus on user adoption, Avaleris delivers tailored solutions that deliver maximum ROI.

Avaleris clients benefit from our extensive deployment experience, deep technical knowledge of Microsoft products and commitment to ongoing client success.

Avaleris focuses exclusively on hybrid identity, enterprise mobility, and cloud security, enabling businesses to improve their agility and security while enabling employee productivity and collaboration.

Ready to maximize your Azure ROI with Avaleris?
