

# Intune Quick Start Mobile Device and Application Management

Offering users secure and efficient access to work from anywhere, on any device, is the goal of cloud enablement in the workplace. Organizations looking to empower their users require mobile device management that is easy, secure, and flexible.

Microsoft Intune, a part of the Enterprise Mobility + Security suite of products, offers mobile device and application management capabilities. Intune is fully integrated with Office 365 and the Microsoft Azure AD, providing clients the power of mobile device and data management fully integrated with their existing on premises AD and Azure AD infrastructure.

As part of this Microsoft Intune Quick Start, our expert consultant will address elements such as:

- Mobile device selection and architecture;
- Mobile app management, data protection and remote wipe of devices;
- Application of corporate security policies; and
- BYOD (Bring Your Own Device) configuration

The Microsoft Intune Quick Start from Avaleris is delivered by a senior consultant with a deep knowledge of identity and access management, enterprise mobility, and the newest Microsoft products.

It includes:

- Planning session around your organization's mobility strategy;
- Mobile application deployment for up to 5 mobile applications, leveraging Intune Mobile Application Management policies to restrict the movement of corporate data between managed and non-managed apps;
- Configuration of mobile policies such as password policies and encryption to address corporate security requirements;
- Deployment to a 0set of users and testing the applied configuration;
- Presentation of the dashboards and reporting available through Intune; and;
- Knowledge transfer with administrators

### Understanding the business value first

We believe that an in-depth understanding of business objectives and continuous optimization is the key to client success. We do not only deploy software, we seek to understand where your institution is headed and what success means to you. Then, we make sure you achieve this with technology adoption support and continued check-ins to ensure that you are meeting all goals and gaining the most value out of your technology investment

### Why Avaleris?

Avaleris is a trusted advisor to hundreds of Microsoft's largest private and public sectors. We go beyond solution deployments. Our team develops an in-depth understanding of your business objectives to ensure you reach your goals and gain the most value from your technology investments. Through strategic planning, well-executed deployments and a focus on user adoption, Avaleris delivers tailored solutions that deliver maximum ROI.

Avaleris clients benefit from our extensive deployment experience, deep technical knowledge of Microsoft products and commitment to ongoing client success.

Avaleris focuses exclusively on hybrid identity, enterprise mobility and cloud security, enabling you to improve their agility and security while enabling productivity and collaboration.

Keep people productive  
anywhere, on any device
